# Auction Source » Touch Screen Technology

## State-of-the-art touch bidding

Automate bidding and provide a huge 'Wow' factor to your event. Use the Touch Systems for Big Board and other high end categories along with bid sheets for silent auction or totally replace bid sheets and host a paperless silent auction! Simply touch the screen with your finger, select an item, enter your bidder number, and place your bid!

### Touch System Bidding

- easy to read, high quality screens
- effortless finger-touch bidding
- showcase your high dollar silent auction items
- color photos and long description with each item
- max bid and buy it now feature
- quick, easy automatic closing
- detailed utilization and bidding reports
- private categories to sell raffle tickets, parties and collect donations
- scribe Live Auction results and display on LCD TV(s)

### LCD HDTV Monitor(s)

- cost-effective way to advertise items for bid at the event
- large visuals for guests to see
- category totals updated continuously
- bidding activity as well as current bids displayed
- may be coordinated with your current Audio Visual company for delivery and set-up
- sponsor or event ads can be displayed on LCD monitor for maximum exposure

### iPod touch® Bidding (wireless bidding)

- wireless bidding anywhere in the ballroom
- guests can bid with ease at their own table
- volunteers can move throughout the crowd escalating the bidding potential
- guests can track and increase bids with ease
- all items available for bidding on the iPod touch

### On-site Professional Team

- set-up consultation with your Auction Source consultant prior to event
- trained, professional staff to set up touch system and LCD monitors
- on-site technical team manages servers and touch system
- technical team will answer any touch system bidding questions
